Kurt Tristan R. Dela Rosa

Mojon, City of Malolos, Bulacan | +63-907-010-0786 | kurttristan.r.delarosa@gmail.com

Objective

Aspiring game and software developer with hands-on experience building 3D games in Unity and C#, plus training in Salesforce development, web fundamentals, and networking. Seeking an internship or entry-level role where I can apply my technical and problem-solving skills and keep growing as a developer.

Education

Bulacan State University, BS Information Technology **2023-2027 (Expected)**

Major: Web and Mobile Development

Technical Skills

- **Languages:** C#, TypeScript, JavaScript, Python, SQL, HTML, CSS, Apex (Salesforce)
- **Front-End:** ReactJS (Vite), TailwindCSS, React Native, Responsive UI Development
- **Back-End:** REST APIs
- **Databases:** PostgreSQL, Relational Database Design
- **Game Development:** Unity, C#, Animator Controllers, Cinemachine, third-person and first-person controllers, light and enemy behavior systems, checkpoint systems, terrain and audio setup
- **Salesforce:** Declarative Automation, Data & Security Modeling, Visualforce, Lightning Web Components, Agentforce
- **Networking:** IP addressing and basic troubleshooting
- **AI & Development:** Claude, Google Gemini, ChatGPT, AI-Assisted Coding, Prompt Engineering, Code Debugging
- **Tools & Practices:** Git and GitHub, VS Code, Figma, Vercel, Agile/Scrum, Debugging, Software Testing, SDLC

Certifications

Information Technology Specialist in Python	**Oct 2026**
Gemini Certified University Student	**Sep 2026**
Salesforce Supported Virtual Internship Program	**Jan 2026**
Agentblazer Champion Workshop	**Sep 2025**
Network Addressing and Basic Troubleshooting	**Mar 2025**
Introduction to HTML	**Apr 2023**
Blockchain 101	**Apr 2023**

Projects

iLabCICT: A Laboratory Maintenance and Technical Support Management System

BSIT Capstone Project | March 2026 | ReactJS (Vite), TypeScript, TailwindCSS, React Native, Django, PostgreSQL, Figma

- Developed a web and mobile platform for BulSU's CICT laboratories to replace informal reporting (chats, logbooks, verbal requests) with a centralized ticketing and equipment tracking system.
- Built features for maintenance request ticketing with tracking numbers, QR code equipment access, computer inventory, repair history, and automated report generation.
- Implemented role-based access for faculty, technicians, and administrators, plus an admin dashboard for request status and response times.
- Worked in an Agile Scrum process with daily standups and Figma prototyping; deployed the web app on Vercel.
- Evaluated against ISO/IEC 25010:2023 quality characteristics.

Lost Light: 2D Adventure/Survival Game

BSIT Game Project | Unity, C# | Android/PC

- Developed the complete game from concept to playable build, implementing all core gameplay systems, including player control, enemy behavior, checkpoints, and level flow.
- Programmed a light management system with three glow levels (dim, medium, bright) that drains energy at different rates and changes both visibility and enemy behavior.
- Built a Light Essence checkpoint system where collectible orbs restore energy and set respawn points, adding risk-reward decisions to progression.
- Implemented varied terrain (dark forest, swamp) that affects movement speed and light drain.
- Translated the team's game design document and 18-scene storyboard into a working game.

Hive — Dormitory Management System

BSIT Group Project | Figma, UI/UX Design, Mobile Interface Design.

- Designed the mobile user interface for a dormitory management system using Figma.
- Refined mobile layouts, navigation, and interface components to improve usability and consistency.
- Created and iterated on mobile UI prototypes based on project requirements and team feedback.
- Collaborated with team members to align the mobile interface with the overall system design.
- Reviewed and refined mobile interfaces to identify layout, usability, and consistency issues.

Awards & Achievements

President’s Lister **2024-2025**

Bulacan State University

Interests

- Game Development (Unity and 3D game design)
- Atmospheric and Story-Driven Game Design
- Web and Mobile Application Development
- Salesforce Development and AI Agents (Agentforce)
- Artificial Intelligence and AI-Assisted Development
